RECEIVED

**RE: Termination of Notice of Violation Docket No. 4407-08  
J.P. Robinson, Limited Mining Operation No. 566ET**

Dear Mr. Robinson:

I have been reviewing our database and found the Notice of Violation issued to you in 2008 was never terminated. The Notice of Violation (NOV), Docket No. 4407-08, was issued on December 22, 2008 for failure to save and stockpile topsoil, failure to post the required permit sign, failure to post topsoil stockpile identification signs, and failure to submit Annual Reports as required by the Wyoming Environmental Quality Act.

Following issuance of the NOV, a meeting was held on site to discuss a negotiated settlement agreement. With the submittal of the required Annual Reports, stripping and stockpiling of additional topsoil identified with proper signage, receipt of cash settlement in the amount of \$2,000, and posting of a permit sign, the terms of the agreement (un-signed) have been satisfied sufficiently to terminate the Notice of Violation.

Please be advised that the above-referenced Notice of Violation is hereby terminated. If you should have any questions regarding this correspondence, please feel free to call.

Please accept my apology that termination of this NOV was overlooked.

Sincerely,

Tanya R. King, P.E.  
District Supervisor  
Wyoming DEQ/Land Quality Division  
District 2, Lander Office
